Types & Treatments Childhood Eczema Adult Eczema Insider Secrets What Is Rosacea Treatment Skin Care & Triggers Insider Secrets Coronavirus Resource Center AAD's Coronavirus Resource Center Will Help You Find Information On How You Can Continue To Care For Your Skin, Hair and Nails. How to care for your skin if you have lupus to help care for your skin during coronavirus pandemic and beyond, AAD recommends these tips from board-certified dermatologists. Basic Skin Care Dry, Oily Skin Hair Removal Tattoos and Piercings Anti-Aging SkinCare For Your Face For Your Skin Routine Bites & Stings Burns, Cuts& Other Wounds Itch Relief Poison ivy, Oak & Sumac Rashes Nail Care Basics Pedicures & Manicures Poison ivy Alert You can get rashes from poison ivy anytime of the year. If you think you have touched a plant, acting quickly can prevent rashes. Sunburn relief To ease your discomfort, follow these dermatologists' tips. Laser hair removal You can expect permanent results in all but one area. Do you know which one? Scar treatment If you want to reduce a noticeable scar, know these 10 things before you have laser treatment. Botox It can smooth out deep wrinkles and lines, but the results are not permanent. Here's how long botox tends to last. Childhood Conditions Learn Healthy Habits Kids' Camp Lesson Plans Surviving Acne During Acne Can Feel Devastating for A Teenager. Here are 5 things you can do to help your teenager. Avoid hand-foot-and-mouth disease It's contagious, but you can reduce your child's risk of catching it. Find out what helps. Scabies? Treat everyone! If your child develops scabies, everyone in your household will need treatment. Follow this advice to treat everyone safely and efficiently. Practice in the safe sun When you go outdoors for warmer weather and fresh air, AAD encourages you to #PracticeSafeSun. Skin cancer, Take a hike!™ Join a hike and you can make a significant impact on skin cancer. Find out how. Find a dermatologist You can search by place, condition and procedure to find the dermatologist who is right for you. Your safety Here's what dermatologists do to keep you safe during the coronavirus pandemic. Welcome to the American Academy of Dermatology's secondary education campaign, Good Skin Knowledge. The goal is to teach young people facts about common skin, hair and nail conditions. Misunderstanding can lead to banter and bullying, which is associated with anxiety and depression. These lesson plans and accompanying handouts are designed to be easily implemented in a variety of settings for the two age groups of 8-10 year olds and 11-13 year olds. Each topic area has different subtopics to choose from with a lesson plan and coordinated activity. Ad From time to time, substitute teachers will go to a classroom and discover that there is no lesson plan waiting for them. When you are familiar with the registered item as a substitute, you can typically use as the basis for a on the subject currently being taught. But a problem occurs when you know a little about the subject of the class. It can be even worse when you don't have any textbook available for review. Make learning fun because as long as the students see you positively, you will probably be asked to return. Therefore, it is best to come prepared for the worst with activities and ideas about things to do with students. Of course, it's always best to relate some work that you give to the subject if you can, but if not, it's still important to keep students busy. As for classroom management, the worst thing to do is to just let them speak. This can often lead to either disturbances in class or even worse noise levels that disturb the surrounding teachers. These curriculum ideas for activities will help you succeed as a sub in this type of situation. Several of these suggestions include games. There are countless skills that students can develop through games like critical thinking skills, creativity, teamwork, and good sportsmanship. Students can practice talking and listening when games are played individually or in groups. Some of these games or activities require more preparation than others. Obviously, you will need to use your best judgment on who will work with a certain class of students. It is also best to prepare with several of these as backups, just in case one does not work as well as you think it should. You can also get student input, as they would like to do. Trivia: Bring trivial stalking questions and set the class up in class. Have them take turns answering questions while holding scores. Draw a picture or write a story about a prop: Bring in a prop and have students either draw a picture of it or write a story or poem about it. Then hand out 'awards' for best in class, most original, funniest, etc. before the end of class. See optical illusions: Print a series of optical illusions, or place them on transparencies or a slide show and slide them on to a screen. Have students spend some time trying to figure out what they're looking at. This is an activity of high interest that can spur interesting discussions. Pictogram Puzzle: Pictogram or rebus puzzle game are word puzzles that are visual (GOT, GOT, GOT, GOT; Answer: FOUR GOT = FORGOTTEN). Print a series of puzzles, link them to a Smartboard, or project them. Play a game of hypotheticals: Bag hypothetical questions for students and have them come up with answers and solutions. These are best if they serve a purpose and instruct while you are still fun. Include questions about first aid or dangerous situations to help students apply the best course of action in these situations. Apples to Apples: Lead player draws a description card (adjective: chewy) from the pile, so the other players each secretly submit a thing card (noun: shark attack) by hand that best suits the Description. The leading player player the thing card that in her opinion best matches description cards. Create your own maps that are discipline-specific (English suffix descriptions: happy, beauteous, gaseous, wonderful, and famous; math stuff: axis, line, average, cube and probability) or find other examples. Crossword or Word Search Puzzle: Keep a stack of crossword puzzles and word search puzzles ready to hand out for students to complete. Hangman: This requires a little preparation. But it is best done in small groups; the winners could then compete in tournament rounds. Origami cootie catchers: Make cootie catchers to use as study guides. Have students place vocabulary terms on the outside and the definition when the inner flap is opened. 20 Questions: Tell students if you're thinking about a person, a place, or a thing. Give them clues after every five questions. It can also be fun to keep scoring while playing. You get a point if you stump them and they get a point if they guess the right answer. Scattergories: The purpose of this famous board game is to quickly fill in a category list of answers that begin with the assigned letter. Points are awarded if other players/teams have not thought of the same answers. The player/team with the most points wins. Fire Winds Blow: Also known as Big Wind Blows or Great Winds Blow, the game is similar to musical chairs. It allows students to get to know each other a little better. You will need chairs, one fewer than the total number of players. One person starts by saying Four win strokes for all who ... and so says a property or behavior that could be true, ... ate breakfast. All players who ate breakfast must quickly find a new seat, there are more than two chairs away from them. If the player is unable to find a free seat, he or she is the new person who is in the middle. Pictionary: You can play a game of Pictionary without the cards. Divide the class into two teams and take turns trying to guess what teammates are pulling on the board. Write mission statements and goals: Teach students all about personalized mission statements and goal exercises. Then guide them as they create their own. There is a widespread misconception that dyslexia is a reading disorder that is limited to reading alone. In reality, dyslexia can also affect writing, spelling and speech abilities. Here's a video showing the various effects dyslexia can have on readers: Effective teachers understand these difficulties and do everything possible to arm themselves with a myriad of resources to help dyslexic students. To this end, I've compiled a list of four lesson plans, some using tried and true methods and others using newer, technologically driven approaches to help educators help their students. Four lesson plans for dyslexic students These lesson plans include games and stations that bring together an entire classroom of students to combat feelings of anxiety, depression, and self-esteem that can be dyslexic students. These social activities help dyslexic students build relationships with their peers while learning in a safe environment. 1. Letter Blend Bingo A problem dyslexic children have is matching letters to their corresponding sounds. Special education expert Eileen Bailey developed a lesson plan for kindergartens, first graders, and second graders to solve this problem. Using bingo charts and flashcards with words that use specific consonant mixes, teachers read a word or display a picture representing the word to their students. Students then place a mark on the bingo square with matching consonant mixture. This process is repeated until the students have matched up enough consonant mixtures to do BINGO. This activity helps dyslexic students learn and remember letters and letter combination sounds by pairing repetition with auditory and visual aids. 2. Spelling Stations Dyslexic students struggle to perceive the order of letters in a word and often mentally rearrange letters into words. To help students who encounter spelling challenges due to dyslexia, Education Corner created Spelling Stations. This lesson plan helps students in first, second, and third grades sharpen their spelling skills using various visual, auditory, writing, and verbal repetition stations. You can create a variety of stations based on the materials and resources available at your school. Here area get ideas to get you started. Letter magnets: Students spell words with magnetic letters on a metal surface. Puzzle time: This station consists of spelling spreadsheets (such as crosswords and word searches) to facilitate word recognition. Colorful words: Students write out assigned spellings using different colors for each letter to create color-letter mappings, facilitating the retention of correct letter-seeing. Word art: Using crayons, markers, glitter and other art materials, students spell and decorate words on building paper that connects the spelling of this word with artistic expression. Your students should rotate between these stations so they can find the method that works best for their learning style. 3. Wordshark School software Wordshark (available in the UK, Australia, New Zealand, South Africa and Ireland) uses multisensory learning to help dyslexic students with spelling, reading and writing. It uses more than 50 games to teach phonics, spelling rules, word sequencing and wording. Each game increases in complexity and adds deadlines to spur student improvement. Instructors can modify this software to meet the needs of individual students and get weekly status reports. Wordshark is available for single players as well as online if you want to use it in a large classroom setting. Prices for the software are divided into levels for the whole school use individual users. 4. Scrabble / Words with Friends Day After weeks of intensive work focusing on word formation, letter letter and spelling, why not take a day to reinforce these concepts through games? Host a game day that includes a classroom Scrabble tournament or a word with friends competition using student cell phones or classroom. Learning Works for Kids includes words with friends among their top five recommended games for children with dyslexia. These games harness students' abilities to spell larger and more complex words in a healthy, competitive environment, motivating them to put what they have learned into practice. Students are much more likely to learn when they have fun with interactive and social lessons, making words with friends a great free lesson tool for students with dyslexia. Additional lesson resources and guides Have you tried any of these lesson splianes? Do you have any other ideas or resources you'd like to see in this list? Let me know in the comments below! Capterra's school administration blog offers a wealth of resources to help you plan lessons for all students and. Here are a few that can get started:
